

# TechTivAI - Final Developer Agenda

## 1. AI Agentic Solutions

AI Agents, Autonomous AI Agents, Multi-Agent Systems, Agentic Workflows, AI Decision-Making, AI Sales Agents, AI Support Agents, AI Operations Agents.

## 2. AI & LLM Solutions

Custom AI Assistants, LLM Applications, RAG Systems, AI Knowledge Bases, AI Chatbots, AI Copilots, Document Intelligence, AI Data Processing.

## 3. AI Automation Solutions

Business Process Automation, AI Workflow Automation, **AI Chatbots, Customer Support Chatbots, AI Sales Chatbots, Lead Qualification Chatbots, WhatsApp Chatbots, CRM Automation, Sales Automation, Marketing Automation, Appointment Automation and Email Automation** using **n8n, Make, Zapier and GHL**.

## 4. Conversational & Voice AI

AI Voice Agents, AI Phone Agents, AI Receptionists, Customer Support Agents and Voice Automation using **Vapi, ElevenLabs and Twilio**.

## 5. AI-Powered Web Development

AI-powered websites, web applications, SaaS platforms, dashboards, customer portals, AI search, recommendation engines and AI/API integrations.

## 6. AI-Powered Mobile App Development

AI-powered iOS/Android applications, AI assistants, AI chat & voice, recommendation systems, AI automation and AI-powered SaaS mobile applications.

## 7. AI/ML & Data Solutions

Machine Learning, Predictive Analytics, Recommendation Engines, Data Intelligence, Computer Vision, NLP and AI Data Processing.

## 8. AI Technology Stack

**OpenAI, Claude, Gemini, LangGraph, CrewAI, AutoGen, n8n, Make, Zapier, GHL, Vapi, ElevenLabs, Twilio, Pinecone, Weaviate, Next.js, React, Node.js, Python, AWS, Azure and Google Cloud.**

## 9. Homepage Product Experience

Redesign the homepage around **TechTivAI as an AI Business Consultant & Transformation Platform**.

### Hero Section

#### Discover What AI Can Do For Your Business

AI analyzes the client's business, identifies opportunities and recommends the right AI, automation, web, app and digital solutions.

CTA:

**Get My AI Blueprint — \$5**

Secondary CTA:

**Talk to AI Consultant**

### After Hero — AI Technology Stack

Show an interactive AI stack section featuring:

**AI Models → AI Agents → Automation → CRM → Voice AI → Development → Data & Cloud**

Include technologies such as OpenAI, Claude, Gemini, LangGraph, CrewAI, n8n, Make, Zapier, GHL, Vapi, ElevenLabs, Next.js, React, Node.js, Python, AWS, etc.

### Homepage Additional Sections

AI Business Assessment → AI Consultant → AI/Agentic Solutions → AI Automation → AI-Powered Web & App Development → AI Stack → How It Works → Blueprint Preview → Pricing → FAQ → Final CTA.

## 10. AI Business Assessment & Blueprint

Build an intelligent assessment system that analyzes:

**Business → Industry → Operations → Problems → Existing Tools → Technology Stack → Marketing → Social Media → Automation Opportunities → AI Opportunities**

The system should dynamically recommend:

- AI Agents
- AI Automation

- Chatbots
- Voice AI
- CRM Automation
- AI-powered Website
- AI-powered Web App
- AI Mobile App
- AI/ML solutions
- Marketing & Social Media solutions

It should also recommend the **specific technology/tool stack** based on the client's requirements.

## 11. AI Consultant - Chat & Voice

After signup, users should be able to communicate with the TechTivAI AI Consultant through:

### Text Chat + Real-Time Voice

Use **Vapi** / **ElevenLabs** for voice.

The AI Consultant must understand the client's:

- Business profile
- Assessment answers
- Existing tools
- Requirements
- Problems
- Generated blueprint and provide personalized recommendations.

## 12. \$5 AI Blueprint & PDF Report

User completes assessment → receives a limited preview → pays **\$5** → complete personalized blueprint is generated.

PDF should include:

- Business Analysis
- Current Technology Stack
- Business Problems
- AI Opportunities
- Automation Opportunities
- AI Agent Recommendations
- Chatbot/Voice AI Recommendations

- Web/App Development Recommendations
- Recommended Technology Stack
- Social Media/Digital Growth Recommendations
- ROI/Impact Analysis
- Implementation Roadmap
- Recommended TechTivAI Services

Allow **PDF download** after successful payment.

## 13. CMS / Admin Dashboard

Create a complete **TechTivAI Admin CMS** to manage all customer and product data.

Admin should be able to view/manage:

- Clients
- Companies
- Assessments
- AI Consultant Conversations
- Voice Calls
- Voice Recordings
- Transcripts
- AI Analysis
- Generated Blueprints
- PDF Reports
- Recommended Services
- Recommended Technology Stack
- Payments
- Subscriptions
- Leads
- Consultation Requests
- Implementation Status

### Admin Dashboard KPIs

- Total Users
- New Assessments
- Paid Blueprints
- Blueprint Revenue
- Active Subscriptions
- AI Chat Sessions
- Voice Calls
- Leads Generated

- Consultation Requests
- Service Opportunities
- Converted Clients

## 14. Client Dashboard

After signup, each client gets their own dashboard.

### Dashboard

- Business AI Score
- Automation Opportunities
- AI Recommendations
- Recommended Services
- Technology Stack
- Blueprint
- PDF Download
- AI Consultant
- Voice Consultant
- Conversation History
- Voice Call History
- Subscription
- Payment History

## 15. Service Conversion System

After AI analysis, the platform should automatically identify:

### “What TechTivAI Can Build For You”

Example:

#### **AI Lead Generation System**

Recommended because your team manually qualifies leads.

#### **AI Voice Receptionist**

Recommended because your business receives high volumes of inquiries.

#### **AI-Powered Web Application**

Recommended because your current workflow requires a custom customer portal.

Each recommendation should have:

**Problem → Recommended Solution → Technology Stack → Estimated Scope → Estimated Timeline → CTA**

CTA:

**Build This With TechTivAI**

This should push the client directly into a **consultation / proposal / payment workflow**.

## 16. Subscription Model

Create monthly subscription plans for continued:

- AI Consultant access
- Business analysis
- New AI recommendations
- Automation opportunities
- Blueprint updates
- AI advisory
- Voice consultation

Also maintain the **\$5 one-time Blueprint** as the entry product.

## 17. Mobile App MVP

Build a React Native/Expo MVP with:

- Login/Signup
- Business Profile
- AI Assessment
- AI Business Score
- AI Recommendations
- Blueprint
- PDF
- AI Chat Consultant
- Voice AI Consultant
- Recommended Services
- Subscription
- Notifications

The mobile app should use the **same backend, AI engine, CMS and client data** as the web platform.

## 18. Full Automated Flow

**Website / Mobile App → Signup/Login → AI Assessment → AI Chat/Voice Consultant →**

↓

**Business Analysis → AI + Agentic + Automation + Web/App Analysis →**

↓

**Technology Stack Recommendation → Service Recommendation → Blueprint Preview →**

**\$5 Payment → Complete Blueprint + PDF →**

↓

**Client Dashboard → AI Consultant → Book Consultation / Request Implementation →**

↓

**TechTivAI Sales & Delivery**

## 19. Developer Recommendation

After reviewing the complete concept, the developer should also provide recommendations for:

**Additional AI services, useful integrations, security, database architecture, AI memory, analytics, automation, scalability, subscription features, mobile-app features and any other functionality that could make TechTivAI a stronger commercial SaaS product.**

### Core objective

**TechTivAI should not be built as a normal AI website. It should be developed as a complete AI-powered product ecosystem that can analyze any business, identify its technology and automation needs, recommend the appropriate TechTivAI services, generate a paid professional blueprint, and convert that opportunity into a high-ticket implementation client.**
